DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 and 19-25 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art considered does not disclose or fairly suggest a MR imaging method in which image data is transformed back to k-space data and a new image reconstructed either with a different resolution or with a partial Fourier transform.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 12-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Foo P.N. 6,393,313.

Foo discloses a MR imaging method. Applicant's attention however, is directed only to the background of the invention and more specifically to the "second method" described at col. 2, lines 32-60. The complex MR data is corrected for non-uniformities such as those described that produce phase errors, before the homodyne reconstruction is performed. That is, before the reconstruction that uses Hermitian symmetry.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haacke et al., Liang et al., Foo et al, and Polzin '545 and '300 all

Art Unit: 2859

disclose MR image reconstruction methods. Note the particulars of each method as described in the abstracts of their disclosures.
